

# Mounting Materials

## Adhesives

### Light Tape® Edge Guard™

A moisture resistant clear tape for interior applications for protective sealing against electric shock.

### Light Tape® VibraMount™

Designed to easily secure Light Tape® panels to almost any surface while eliminating vibration, VibraMount™ is a double sided adhesive foam core material available in tileable panels.

### Durashield 511 overlay series

A 3M® 4195C/EZ Polyethylene Protective Tape is perfect for exhibitions, museums and temporary events. It protects Light Tape™ from side scuffing, abrasion and impact while on temporary installations of a few weeks

### Durashield 471

(3M® 471 for floor marking) is designed for more heavy duty industrial or permanent applications such as factory floors. Both materials were developed by 3M® to deliver the perfect Light Tape adhesion and barrier for floor applications.

### VHB

Designed to secure Light Tape® strips to almost any surface while eliminating vibration, VHB is a double sided adhesive foam core tape. Clear core is available in 0.5" (12.7mm) and 1" (25.4mm) and black core 60 mil (1/16" / 1.6 mm) is available in widths up to 24" (609.6mm) for large panel installations. Also, it provides impact resistance on uneven surfaces.

## Protective sealants

### 3M® DP-100+ epoxy

A two part epoxy system offering fast cure and machinability. It is easily mixed and meets UL 94. Perfect potting compound for outdoor connections.

### Light Tape® shrink tube

A heat-forming tube used in conjunction with our outdoor Snap-N-Light™ mounting system to form a moisture barrier and secure connector to channel.
