

Introducing StepGuard® Climax

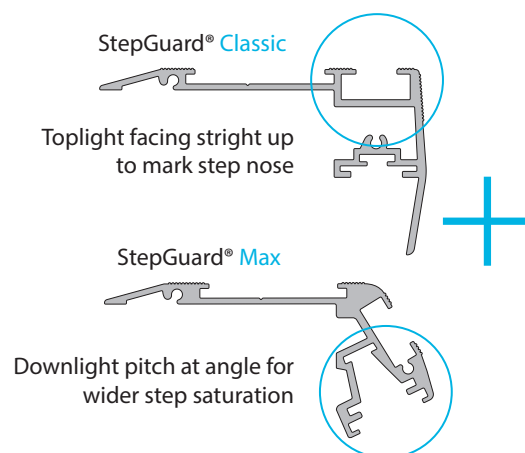

We took the best features of two of our most popular stair nosing and made the ultimate wayfinding solution!

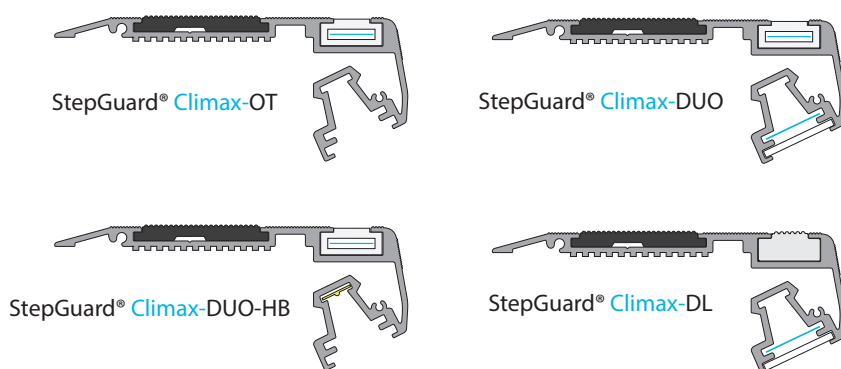

- Ideal for all steps, especially refurbishments. Screw anchor point is 1/2" further back for solid drilling into terra firma.
- Light Tape points directly up without glare. Direct view LEDs will temporarily blind you.
- Bottom light at an angle for a further pitch on step landing.
- Anchor feet on bottom if glueing is the preferred installation method.

Classic and Max together to form the StepGuard® Climax

- Light Tape is sealed to an IP67 rating to prevent liquids from entering
- Less than 1 watt a meter for both Light Tape lamps combined
- Bright with no glare, light the step landing but not the venue
- One smart Driver per venue, dims to zero without any flicker
